# WHITEPAPER v0.1

# A GRADE VERSION OF \$RISE(EVERRSIE) A PROPRIETARY, HYPER DEFLATIONARY TOKEN

Arise token holders are not only rewarded through static rewards but also through true automatic burns every trade from within the liquidity pool. On top of the automated buys from the Whale Wallet(a.k.a Ryzen) upon every market sell, "**AriseMoonShots**" will be activated at certain milestones using the Whale Wallet's BNB (improved fork of MoonRise) and also there's a dedicated token allocation for Community Airdrop Marketing Programme (CAMP).

# Why invest in ARISE?

Arise token holders are not only benefited through static rewards but also by the Buy-Back process of the contract. As part of Buy-Back process, contract takes care of buying back some of the tokens and burn them whenever a sell happens. In a nutshell, 98% of the time, you will not see 2 sell transactions at any time and there will never be three sell transactions continuously at any time.

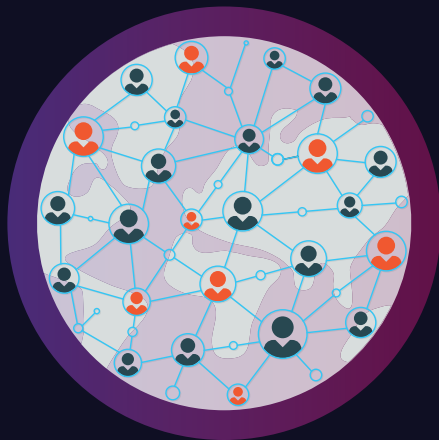

Arise is direct fork of Everrise & also taking advantage of MoonShot feature via improved fork version of MoonRise, the reason why we are calling it as a A Grade version of \$Rise (Everrise) is because of CAMP (Community Airdrop Marketing Programme).

Apart from Marketing Wallet, which we will utilise for Marketing / Promotion / Exchange Listings etc., we will also have x% supply dedicated for CAMP (Community Airdrop Marketing Programme).

We will organise Regular Contests which will help our Community with regular Airdrops, this will help in community marketing and bring new investors in space. Following this we all can contribute in marketing and help build our Community-Driven Ecosystem stronger.

# What Makes \$ARISE So Special?

## “COMMUNITY FOCUSED”

We have dedicated allocation for CAMP (Community Airdrop Marketing Programme) from total supply just for rewarding our community. We will organise Regular Contests which will help our Community with regular Airdrops, this will help in community marketing and bring new investors in space. Following this we all can contribute in marketing and help build our Community-Driven Ecosystem stronger.

# What Makes \$ARISE So Special?

## “HODL & Earn \$ARISE”

It pays to buy yourself some \$ARISE. No, literally. Every transaction made (buy and/or sell) rewards ARISE holders with 2% back according to their stake (Also, most of fees are burned!). Hold your ARISE, treat yourself to some more, and the opportunities are quite literally limitless!

# What Makes \$ARISE So Special?

## "IMPROVED FORK"

With Arise we aim to present the best version of EverRise & MoonRise Fork, we are adapting best features of both contracts. Automatic buyback feature from original EverRise code and Moonshot feature from MoonRise. Moreover, we have averaged Tax Fees contributing Tokenomics, 2% of each transaction goes to the Marketing Wallet [from 3% in EverRise][from 1% in MoonRise], 7% of each transaction goes to the Whale Wallet [from 6% in EverRise][from 8% in MoonRise], by averaging Tax Fees from both EverRise & MoonRise, Arise becomes the most stable / balanced fork.

# Transaction Fee Breakdown

( We Believe in Averaged Tax Fees of EverRise & MoonRise )

**02%**

## MARKETING TAX

2% of each transaction goes to the Marketing Wallet [from 3% in EverRise] [from 1% in MoonRise]

**02%**

## REWARDS TO HOLDERS

2% gets redistributed among Holders [same % in both EverRise and MoonRise]

**07%**

## BUY-BACK TAX\*

7% of each transaction goes to the Whale Wallet [from 6% in EverRise] [from 8% in MoonRise]

\*will be utilized to keep the price of the token in check by buying back the tokens and burning them

**13%**

# ARISE Roadmap

## Phase 1

- Build website and finish white paper
- Social media setup
- Marketing strategy
- Organising Initial Airdrop

## Phase 2

- Organising Private / Presale (DXSale)
- Token Launch (Pancakeswap Listing)
- BSCscan listing
- Trustwallet Logo Update
- Coin audit (Techrate, Certik Audit etc)
- CoinGecko listing
- CoinMarketCap listing
- Influencer marketing
- Exchange listing

## Phase 3

- Website re-design
- Hiring new team members / agencies
- Community Airdrop Marketing Programme (CAMP) Contests
- Moving Ecosystem to multiple smart contract compatible blockchains
- Introduce Tax Free Version of Arise token which will always represent primary Arise token
- Yeild Farming / Staking / Trading with normal 0.1-1% slippage etc.,

## Phase 4

- Arise's own Launchpad platform with both Certified (KYC) and non certified (DefiZone NON-KYC) Projects
- Free NFT Marketplace with no additional fees to mint/sell NFT's
- First NFT Aggregator Tool, just type what you want and it will search similar term in different NFT Marketplaces and diisplay results with various Sort options

A Proprietary, Hyper Deflationary Token

## MEET THE RYZEN

6% of all transactions (buys and sells) is stored inside our contract. This BNB cannot be withdrawn and is used to purchase tokens after every sell. Our community has named this wallet the RYZEN. He is the biggest whale of all and he is on our team to save us from unprecedented times.
